

# Frequently asked questions

"Clear up your doubts about mind.capital"

# Frequently asked questions

## Is there a guaranteed minimum return?

Although historically it is achieving a daily return of between 0.5 and 1.5%, we cannot guarantee a minimum return, since the profitability obtained depends on a multitude of variables.

## How can I participate?

To participate you just have to open an account on the platform and make a contribution of at least \$ 100.

## What forms of payment exist to make contributions?

They can be made directly in BTCs by sending the amount to the wallet that appears when you complete the process or pay directly by credit card.

## Can I withdraw my contribution?

Yes, mind.capital guarantees the purchase of the participation from the person who decides to withdraw at the market price at the moment in which the person decides to withdraw. Participations can be withdrawn at any time after their expiry.

## When will my participation start to generate profitability?

Depending on the time difference of each country and the moment in which the receipt of a contribution is confirmed, the collection of daily returns can take up to **two to three days maximum**.

## Is this not just another scam?

Unfortunately, it is true that more and more scams are emerging with the cryptocurrency boom. The difference between a scam and a real project is the information offered, the generation of value and the proven facts. mind.capital is a platform led by Gonzalo García-Pelayo, who has not only dedicated his life to the development of winning systems, but has repeatedly demonstrated that he is able to obtain economic advantages in environments where nobody had previously earned money. Our system generates value daily and so that there is no doubt, it is distributed every day among the participants. In addition, mind.capital allows you to withdraw contributions at any time after the end of the investment term. Finally, mind.capital is integrated with Blockchain, which means that the money is just one click away from each person's wallet and therefore has to be within the system. The fact that at any time, any person can make a balance withdrawal implies that the money deposited has to be available in the platform wallet in order to be transferred.

## How are the returns received?

Returns are paid daily in dollars in the account of each investor (except weekends and holidays).

## How can I make contributions in Bitcoins?

To make payments in Bitcoins it is necessary to have Bitcoins in a wallet. If you don't know how Bitcoins work you can find out [here](#).

### **By participating in mind.capital, am I buying cryptocurrencies?**

No, when you participate in mind.capital you are contributing capital to a system that invests in different crypto assets, but you are not acquiring cryptocurrencies as such. You acquire a right to collect the daily return obtained by your contribution.

### **Is it a safe investment?**

We have been researching and developing our platform for a long time and although it is true that so far our results have been positive, operating in the crypto-assets market implies a high level of risk. Although the team of specialists and professionals behind mind.capital works daily to obtain the best results, crypto-assets are always high-risk markets. Whenever crypto-assets are acquired, we must be aware of all the associated risks and bear in mind that high returns always imply taking greater risks and of course if you have any doubts you should seek advice from an independent financial advisor.

### **Do you invest in Bitcoin?**

Bitcoin is one of thousands of crypto-assets whose evolution we track and analyze and as for the rest of crypto-assets, depending on each moment we can carry out operations with it.

### **What value will my participation have if I decide to withdraw it?**

The value of the participation is calculated daily depending on the time it took place, the returns obtained and the demand for new contributions.

### **Why do you not distribute profits on weekends?**

Our system works with different crypto-assets and their changes into different currencies. Currency markets do not work on weekends, which conditions us to operate only on weekdays.

### **What does mind.capital invest in to obtain its profitability?**

We continuously monitor and analyze the evolution of thousands of crypto-assets and their exchange rate in different currencies and through the use of advanced algorithms we detect real-time buying/selling opportunities. Depending on each moment we can operate in several crypto-assets simultaneously or in only a few or none. The value of our system is in knowing what crypto-assets, what currencies and at what time you have to buy or sell and that information, of course, we cannot make public.

### **If I withdraw balance from my account, do I receive it in Bitcoins?**

Yes, balance withdrawals or of a contribution are always made in Bitcoins at the exchange rate existing between the dollar and Bitcoin at the time of the operation.

### **Is it possible to reinvest earnings?**

Yes, and to optimize your returns and take advantage of the enormous potential of compound interest, the accounts have the option of automatically reinvesting the balance generated once the \$ 100 limit is reached.

### **What is compound interest?**

Compound interest is interest that produces interest, that is, interest in each period is added to the initial capital to produce new interest.

### **Does mind.capital use Blockchain technology?**

Yes, the platform is integrated with Blockchain, which facilitates that for example payments are automated and when a withdrawal is requested it is done instantly.

### **Is there a minimum amount to withdraw my returns?**

Yes, in order to withdraw money it is essential to have a minimum of \$ 50 accumulated in your account balance.

### **Do I have to pay tax on the profits obtained?**

Depending on the country in which you reside, all income obtained must be declared. Our recommendation is that if you have any questions, seek advice from an expert professional and always comply with the tax obligations of the country where you reside.

### **Do you pay returns every day?**

Returns are calculated and distributed every working day, although if one day the result is negative, no income will be received. The entire team of professionals behind mind.capital has spent many hours developing the system and all our efforts are aimed at optimizing profitability, but unfortunately it would be a mistake to say that we make money every day. Some days, fortunately they are very few, the profitability obtained can be negative and that day there will be no distribution of profits.

### **What are the management and maintenance costs?**

To cover the necessary expenses for the operation of the platform, we withdraw 35% of the profits generated, in this way daily when we make the payment of the profitability obtained, 35% is withdrawn to maintain the platform and the remaining 65% is distributed. It is important to note that mind.capital only obtains income when money is earned.

### **Is any other type of commission charged?**

No, mind.capital only charges 35% for management and maintenance expenses of the daily benefits obtained. When making contributions or withdrawals from the balance, a small commission is charged, but it is not for mind.capital, rather to cover the expenses of the transfer of BTCs through Blockchain and to cover the possibility of increases or decreases in the price of Bitcoin with respect to the dollar, since the contribution or withdrawal is requested.

### **Can I make different contributions from the same account?**

Yes, you can contribute as many times as you want. The only limit is that the minimum amount for each contribution is \$ 100 and the sum of all contributions made from the same account cannot exceed \$ 100,000.

### **Can I recommend it to my friends?**

Yes of course. Furthermore, there is a referral program that offers advantages for the person making the recommendation. You can see more information in the [referral program](#).

### **Can I sign up for mind.capital without being referred or recommended?**

No, it is necessary to have a referral to be able to register.

### **Is there a referral program or a friends plan?**

Yes, there is a referral program for people who want to generate a team or network of recommendations. You can check all the information in the [referral program](#).

### **What security is implemented in the accounts that open in mind.capital ?**

All accounts opened in mind.capital have the option to configure double authentication (2FA) for account access and for withdrawals. In addition, to avoid phishing (email is sent by someone impersonating mind.capital) all communications sent from mind.capital incorporate a special phrase that the user must choose.

### **What does Gonzalo García-Pelayo bring to the investment in crypto-assets?**

Gonzalo García-Pelayo after winning at casinos, pools, poker and sports betting has been able to find a way to make crypto-assets profitable. Gonzalo brings all this knowledge and experience and together with a team of experts has developed mind.capital to make it available to everyone.

### **Do you have an App for Android or iPhone?**

No, mind.capital is adapted to access with any mobile device but no specific App for Android or iPhone has been developed. Any App that is advertised from the iPhone or Android stores does not belong to mind.capital and therefore will not allow trading with mind.capital accounts.
